

RAM ASHISH YADAV

Full Stack Developer | MERN Stack | React.js | Node.js | REST APIs

+91-7860470816 | yadavramashish42449@gmail.com | LinkedIn | GitHub | Noida, Uttar Pradesh, India

PROFILE SUMMARY

Results-driven Full Stack Developer and React Developer with hands-on production experience building enterprise financial systems and MERN stack web applications. Delivered a multi-tier accounting system for a UAE-based company in a 60-day remote sprint. Proficient in React.js, Node.js, Express.js, MongoDB, JWT authentication, REST API design, WebSockets (Socket.io), and Agile/Scrum workflows. Passionate about building scalable, secure, user-centric products. Open to full-time junior/associate developer roles in fast-paced engineering teams.

WORK EXPERIENCE

Jr. Full Stack Developer (Intern) — Global Tech Reach, Dubai UAE (Remote)

Nov 2025 – Jan 2026

- Engineered a production-grade multi-tier Accounting System in 60 days — real-time Chart of Accounts, Double-Entry Journal with automated VAT & TDS calculation logic, and dynamic Cash Flow tracking used by the company's finance team.
- Built an Expense module with automated debit note generation, multi-mode payment processing, and optimized financial reporting & export tools deployed across all accounting modules — reducing manual effort by ~60%.
- Designed responsive React.js + Tailwind CSS dashboards; built REST APIs with Express.js and MongoDB; collaborated in an Agile remote team with Git branching and daily GitHub PR reviews.

PROJECTS

E-Shop (E-Commerce Platform) | MongoDB, Express.js, React.js, Node.js, JWT, Tailwind CSS (GitHub)

- Full-stack platform with dynamic product catalog, JWT + RBAC authentication, category management & filtering; optimized MongoDB queries for sub-200ms API response times.
- Built fully responsive React.js + Tailwind CSS UI with real-time state management for cart updates, search filtering, and seamless checkout; RESTful APIs with role-based admin and customer endpoints.

Chatify (Real-Time Chat Application) | MongoDB, Express.js, React.js, Node.js, Socket.io, Tailwind CSS (GitHub)

- Bidirectional real-time communication via Socket.io (WebSockets) supporting 200+ simultaneous sessions; JWT-based auth middleware and MongoDB-based persistent chat history across user sessions.
- Built typing indicators, read receipts, and dynamic active user lists — responsive React.js + Tailwind CSS cross-device experience.

Fit-Journey (Fitness Tracking App) | React.js, Tailwind CSS, TypeScript, Vite, React Router (GitHub)

- Developed a responsive frontend fitness dashboard for tracking daily workouts and visualizing health metrics; integrated API endpoints for secure user authentication and dynamic workout logs deployed on Vercel with CI/CD pipeline.
- Implemented robust client-side error handling and form input validation; maintained detailed GitHub documentation for UI components and application state logic throughout development.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Java

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS3, Context API, Redux

Backend: Node.js, Express.js, REST API design, JWT, Socket.io (WebSockets), MVC architecture

Databases: MongoDB (Mongoose ODM), MySQL, query optimization, indexing

Testing & Tools: Postman, Jest, Git, GitHub, VS Code, npm

Cloud/DevOps: Docker, AWS, CI/CD Pipeline

Methodologies: Agile/Scrum, SDLC, RBAC, input sanitization

EDUCATION

B.E. Computer Science & Engineering — IET, Dr. Bhimrao Ambedkar University, Agra, Uttar Pradesh | 2022 – 2026

Relevant coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, OOP, Software Engineering

CERTIFICATIONS

Intern Certify – Java Programming Certification

Udemy – The Complete Full Stack Web Development Bootcamp

Oracle – Oracle AI Foundations Associate

EXTRACURRICULAR

- Self-taught Full Stack developer since 2023 — progressed from HTML/CSS/JS to production-grade MERN stack applications with JWT auth, real-time features, and database integration.
- Remote work experience with a Dubai-based international team — async collaboration, Git PR workflow, sprint-based delivery across time zones.
